UNDER ARMOUR LE MANSORY EXTERIOR

IDEA San Francisco – To promote the new clothing line from UNDER ARMOUR and MANSORY, which will be launched in August 2025, MANSORY presented an exclusively built “ONE-OFF” version of the legendary “Le MANSORY” at an exclusive party on the eve of the NBA All-Star Game in San Francisco. This vehicle - inspired by Stephen Curry - will now be used as an eye-catcher with the name “MANSORY x UNDER ARMOUR Le MANSORY” for a nationwide marketing campaign in the United States of America and will make more appearances throughout the year.

Additionally, the collaboration includes a matching pair of UNDER ARMOUR Echo sneakers, in the same colourway and design scheme as the Le MANSORY. The sneaker will launch in April 2025, with an early debut in a bold colourway. The “MANSORY x UNDER ARMOUR Le MANSORY” convinces and impresses its viewer at first glance thanks to its 5 cm wider full carbon body and its extensive changes in the aerodynamics area and makes the heart of every motorsport enthusiast beat faster.

The completely new and exclusively developed LED main headlights are of particular importance to the design language of the “MANSORY x UNDER ARMOUR Le MANSORY.”
This lighting system, divided into four individual headlights, gives the “MANSORY x UNDER ARMOUR Le MANSORY” a completely unique look, which on the one hand clearly distinguishes it from the standard, rather rounded Ford GT, but on the other hand also references it as best as possible and, thanks to the new design language, gives it a visual brilliance that makes the “MANSORY x UNDER ARMOUR Le MANSORY” unmistakable thanks to the enlarged air intakes and the new rear wing with integrated flaps.

UNDER ARMOUR LE MANSORY INTERIOR

As is usual with all MANSORY complete conversions, almost no component in the interior was left untouched by the MANSORY specialists. Following the external colour concept, the colors black and yellow also dominate the interior of the "Le MANSORY UNDER ARMOUR" promotional car.
The materials used are exclusively leather, visible carbon fibre and Alcantara. The interior is also lined with Alcantara in the area of the dashboard. The numerous carbon applications distributed throughout the passenger compartment complement and compose the interior into a harmonious whole.
